

Macomb Township Fire Department

FIRE AND LIFE SAFETY PUBLIC EDUCATION

The Macomb Township Fire Department cares deeply for the community. It is our goal to keep the community safe – not just by chance. We understand our role is to take the lead on developing risk reduction strategies to create this safer community. There are benefits associated with a safer community.

- Reduced risk to residents, visitors and employees within the community
- Increased property values
- A more economical and efficient use of emergency services
- Develop a more attractive community

A public that is well-educated in the ways of fire and life safety can mitigate or stop the dangers they face. Stopping a tragic event before it happens *is* saving lives. Once the event takes place, we will use our training, skill and preparation to mitigate the damage already done.

The saving of one life is worth all the effort!
